**Broker Email from Health Net**

**Subject line:** Health Net to Exit Commercial Group Market

**Please read all of this notice.** It contains important information about Health Net's group health plan coverage.

After careful consideration, Health Net has decided to discontinue offering commercial group health plans in California.

**This includes the closure of all California group plans including:**

- California Small Business and Large Group Medical Plans

Health Net has made the decision to exit the traditional commercial group business in California in order to focus on its core business of government sponsored healthcare. This change does not impact the Medi-Cal, Marketplace/Covered California or Medicare lines of business.

A formal notice has been sent to employer groups via USPS, and they should receive it in the coming days. In many cases, policies will last through the existing policy period. Employers will receive notice of their specific coverage end date in their formal notice.

Despite our decision to exit the Employer Group Commercial Medical business, we remain committed to the health and well-being of our members, customers and stakeholders. Continuing to provide the customer service and care our customers need remains of great importance to us as our existing group medical customers begin looking for replacement coverage.
